Graduate Projects CubeSat Section – MidSemester Review

The MidSemester review is used to assess your engagement and accomplishments up to this point in the semester as part of the CubeSat of Graduate Projects under the supervision of Professor Palo. The assignment includes two deliverables

1. A PowerPoint presentation that covers
    a. Your original plan for the semester
    b. What you have accomplished to date
    c. Your plans for the remainder of the semester
    d. The impact of your work this semester to the SWARM-EX team
    e. Any concerns or risks you have identified that impact your ability to execute your plan for the remainder of the semester.
2. A 10 minute recorded presentation of your PowerPoint presentation.
    a. This can be done as a voice over in PowerPoint or a Zoom recording.

You do not need to dive into all of the details of your work. This is a high-level presentation that should be succinct and understandable to your classmates who will be evaluating your presentation. Keep it interesting and consider using pictures or graphics to motivate and support your narrative. A slide deck that is all text is boring, so get creative where possible.

MidSemester Review Rubric (Total 20 points)

	Unacceptable	Poor	Below Average	Average	Above Average	Excellent	Outstanding
Content	0	2	5	7	8	9	10
Presentation Clarity	0	1	2.5	3.5	4	4.5	5
Figures/Plots/Graphs	0	1	2.5	3.5	4	4.5	5

Process and Due Dates

- Presentations and recordings are due 10/14/26
    - You will upload your PPT and presentation to both Gradescope and a OneDrive folder
- You will review each of your classmates presentations and provide a short evaluation based on the above rubric. An Excel spreadsheet will be available to submit your peer assessments via Gradescope (please upload the xlsx file). Due 10/21/26.
